Katherine Ognyanova

Assoc. Prof. Rutgers University

E-mail:
kateto@ognyanova.net

Katherine Ognyanova (Katya) is a researcher and educator exploring the structure of social and political processes in a digital age. She works as an Associate Professor at the School of Communication and Information, Rutgers University. Her research examines the effects of social influence and technology on civic and political behavior, confidence in institutions, information evaluation, and public opinion formation. Her methodological expertise is in computational social science, network science, and survey research. Recently, her work has examined the association of misinformation exposure with trust in science, media, and politics. She is also investigating public perceptions and trust in artificial intelligence (AI).

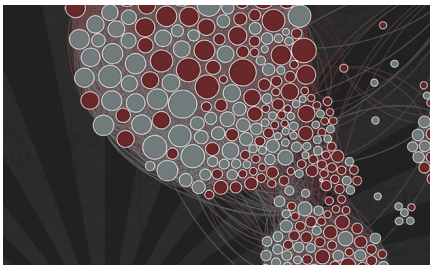
Katherine is the director of the Rutgers Computational Social Science Lab. She is one of the founders and a principal investigator for the COVID States Project and the Civic Health and Institutions Project, two large multi-university initiatives exploring public attitudes to politics and health. Ognyanova is also a PI of the National AI Opinion Monitor, an initiative tracking public perceptions, knowledge, and trust in artificial intelligence technologies.

Ognyanova's research has been supported by the *National Science Foundation* and the *Russell Sage Foundation*. Her work has been covered in news outlets including *New York Times*, *NPR*, *Politico*, *Washington Post*, and *WIRED*, among others. Her papers have appeared in leading communication journals such as the *Journal of Communication* and *Communication Research,* as well as high-profile

interdisciplinary journals such as *Nature* and *PNAS*.

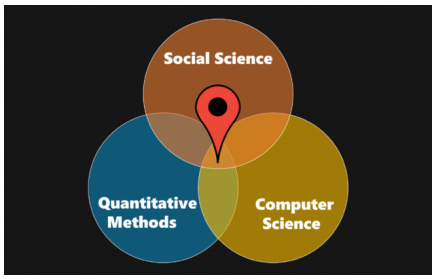
Prior to joining Rutgers, Katherine was a postdoctoral research fellow in computational social science at the Lazer Lab, Northeastern University and IQSS, Harvard University. She received her Ph.D. from the Annenberg School for Communication & Journalism, University of Southern California.

If you are trying to figure out how to pronounce "Ognyanova", check out this post.



Static and dynamic network visualization with R

This is a comprehensive tutorial on network visualization with R. It covers data input and formats, visualization basics, parameters and layouts for one-mode and [...]



Computational Social Science R Code

This post includes R code and materials from my Computational Social Science course at Rutgers University. The course offers theoretical discussion and hands-on training using [...]

Sunbelt network visualization: R and Gephi tutorials

More details to follow, but for now: workshop materials from Sunbelt 2016. Basic and Advanced Network Visualization with Gephi Sunbelt 2016 workshop materials Network [...]
